Chairs' Welcome Message

We are very pleased to welcome our colleagues from Europe and other parts of the world to this conference, the second in the series under the title European Modelling Symposium, EMS2008, being held at Liverpool Hope University. The first was held at University College London, in September 2006 and attracted around 50 papers. The conference program committee has organized an exciting and balanced program comprising presentations from distinguished experts in the field, and important and wide-ranging contributions on state-of-the-art research that provide new insights into the latest innovations in the field of modelling and simulation. Being the second such event in the UK, we are hopeful that its outstanding technical content contributed by leading researchers in the field from UK, Europe and worldwide will ensure its continued success, and expect to convene the next meeting in another European city in 2009, perhaps later in the year to avoid clashes with other European simulation conferences.

EMS2008 is technically sponsored by IEEE Computer Society (UK & RI), UK Simulation Society, Asia Modelling and Simulation Society, European Federation of Simulation Societies (EUROSIM), European Council for Modelling and Simulation (ECMS), Liverpool Hope University, Kingston University, Norwegian University of Science and Technology, and Nottingham Trent University. EMS2008 has proved to be very popular and more international than expected, with submissions from 33 countries, ranging from as far as New Zealand, Japan, and Korea, countries in South East Asia and the Middle East as well as European countries. The conference program committee had a challenging task of choosing high quality submissions. Each paper was peer reviewed by several independent referees of the program committee and, based on the recommendation of the reviewers, less than 110 papers were finally accepted. The papers offer stimulating insights into emerging Modelling and simulation techniques in a wider variety of fields within science and technologies in the broadest sense of their meaning. We would like to express our sincere thanks to the plenary speakers, authors, session chairs, members of the program committee and additional reviewers who made this conference such an outstanding success. Finally, we hope that you will find the conference to be a valuable resource in your professional, research, and educational activities whether you are a student, academic, researcher, or a practicing professional. Enjoy!
