Aim and Scope

Computational intelligence is a well-established paradigm, where new theories with a sound biological understanding have been evolving. The current experimental systems have many of the characteristics of biological computers and are beginning to be built to perform a variety of tasks that are difficult or impossible to do with conventional computers. In a nutshell, which becomes quite apparent in light of the current research pursuits, the area is heterogeneous as being dwelled on such technologies as neurocomputing, fuzzy systems, probabilistic reasoning, artificial life, evolutionary algorithms, multi-agent systems etc.

IJCIR is a peer reviewed international journal with a key objective to provide the academic and industrial community a medium for presenting original cutting edge research related to computational intelligence and its applications. IJCIR invites authors to submit their original and unpublished work that communicates current research on computational intelligence both the theoretical and methodological aspects, as well as various applications in real world problems from science, technology, business or commerce.

Abstracted/Indexed in

ACM Computing Reviews, ACM Guide to Computing Literature, DBLP.

Frequency of Publication

Publish one volume with two issues this year.

Guidelines for Contributors

IJCIR publishes two types of articles: regular papers and brief papers. Review management is primarily under the direction of an associate editor, who will solicit reviews for each submission. The associate editor will ordinarily make a recommendation after receiving three independent reviews. To avoid delays in processing your paper, please follow these guidelines.

Submission of Manuscripts

All correspondence concerning submissions is between the author and the Editor in Chief. To submit your paper for consideration, visit the web submission system found at <http://ijcir.ujn.edu.cn/author/submit.php>

Submitted papers must be in English and should not have been published elsewhere or being currently under consideration by any other journal. The final decision on publication is made by the Editor-in-Chief upon recommendation of an Associate Editor and / or an Editorial Board Members.

International Journal of Computational Intelligence Research is online at <http://www.ijcir.info>. Visit the journal's home pages for details of aims and scope, readership, instruction to authors and publishing procedure and table of contents. Use website to order a subscription, reprints, a sample copy or individual articles.
