Chairs' Welcome Message ...................................................................................................................... viii
Organization ............................................................................................................................................... ix

## Web Services Architecture, Modeling and Design

Automatic Service Composition Based on Process Ontology ................................................................. 3  
*Gexin Li, Shuiguang Deng, Haijiang Xia, and Chuan Lin*

The WINGS of jCOLIBRI: A CBR Architecture for Semantic Web Services ........................................ 7  
*Juan A. Recio-García, Juan M. Gómez-Berbis, Belén Díaz-Agudo,  and Pedro A. Gómez-Calero*

A CTR-Based Approach to Service Composition Patterns ....................................................................... 13  
*Dumitru Roman and Ioan Toma*

Service Retrieval Based on Behavior Model in Pervasive Computing Environments .............................. 19  
*Qi Ye and Guo-xing Song*

An Integrated Design of Fast LSP Data Plane Failure Detection in MPLS-OAM ................................. 23  
*Yudan Su*

## Semantic Web, Ontologies

OWL-S Based Interaction Testing of Web Service-Based System ........................................................... 31  
*Ying Yu, Ning Huang, and Qiuzhong Luo*

Transforming Valid XML Documents into RDF via RDF Schema .......................................................... 35  
*Pham Thi Thu Thuy, Young-Koo Lee, Sungyoung Lee, and Byeong-Soo Jeong*

## Quality of Service, Scalability and Performance

A Simple Approach to Optimize Web Services' Performance ............................................................... 43  
*Tanakorn Wichaiwong and Chuleerat Jaruskulchai*

A Semantic QoS-Based Web Service Discovery Algorithm for Over-constrained Demands .................. 49  
*Kyriakos Kritikos and Dimitris Plexousakis*
A Framework for Measuring Performance in Service-Oriented Architecture .............................................. 55
Jin Sun Her, Si Won Choi, Sang Hun Oh, and Soo Dong Kim

On Describing and Ranking Services Based on Non-functional Properties ................................................. 61
Ioan Toma, Dumitru Roman, and Dieter Fensel

Web Services Security

A Formal Model for Dynamic Web Services Composition MAS-Based and Simple Security Analysis Using Spi Calculus .................................................................................................................. 69
Dong-Hong Xu, Yong Qi, Di Hou, Ying Chen, and Liang Liu

Secure Key Authentication Scheme Based on Discrete Logarithms .......................................................... 73
Eun-Jun Yoon and Kee-Young Yoo

How to Trust a Web Service Monitor Deployed in an Untrusted Environment? ........................................... 79
Mahantesh Hosamani, Harish Narayanappa, and Hridesh Rajan

Services Orchestration for Web Information Extraction ............................................................................... 85
Mohamed Quafafou, Zahi Jarir, and Mohammed Erradi

Customization, Reusability, Enhancements

ATHENE - An Approach for Modeling Semantic Web Processes over User-Friendly and Editable Ontology Models .................................................................................................................. 93
Akhilesh K. Sinha and Nishant Singh

Core Mechanisms for Web Services Extensions ........................................................................................ 99
Miguel Pardal

A Framework for the Requirements Analysis of Service-Oriented Workflows ........................................... 104
Jochen L. Müller, Andreas Büchner, and Paul Müller

Web Services Standards

Web Service Discovery - Reality Check 2.0 ................................................................................................. 113
Stephan Hagemann, Carolin Letz, and Gottfried Vossen

Key Issues in Building Web-Based Services ............................................................................................... 119
Zhiyi Qu, Yuanting Ge, Kaiyuan Jiang, and Tiangang Lu

On the Use of Ontology Reconciliation Techniques in SOA .................................................................... 123
Patrício de Alencar Silva, Ulrich Schiel, José Eustáquio Rangel de Queiroz, and Cláudia M. F. A. Ribeiro

Short Papers

A Technology for LFBs Topology Layout in ForCES Architecture ............................................................. 131
Jiandao Xia, Weiming Wang, and Ming Gao
Modeling Learning Contents Based on Web Services ................................................................. 135
   Jingjing Liu, Yijian Wu, and Wenyun Zhao

Aspect Mining for Dynamic Service Orchestration ................................................................. 141
   Hao Yang, Junliang Chen, and Xiangwu Meng

Author Index .................................................................................................................................... 147
We are very pleased to welcome our colleagues to the International Conference on Next generation Web Services Practices (NWeSP’07). NWeSP’07 is a forum which brings together researchers and practitioners specializing on different aspects of Web based information systems. The second conference will bring together the world’s most respected authorities on semantic web, Web based services, Web applications, Web enhanced business information systems, e-education specialists, Information security, and other Web related technologies. NWeSP’07 addresses the following important themes:

- Web Services Architecture, Modeling and Design
- Semantic Web, Ontologies (creation, merging, linking, and reconciliation)
- Database Technologies for Web Services
- Web Services Security
- Quality of Service, Scalability and Performance
- User Interfaces, Visualization and modeling
- Customization, Reusability, Enhancements
- Web Services Standards
- Web Services Applications
- Web Based e-Commerce, e-learning applications
- Home Network
- Grid Based Web Services
- Web Services Intellectual Property

NWeSP’07 is technically co-sponsored by The International World Wide Web Conference Committee (IW3C2) and is organized in cooperation with the IEEE Computer Society, USA. NWeSP’07 is supported by the IEEE Computer Society’s Task force on Electronic Commerce. Each paper was peer reviewed by at least three or more program committee members and based on the recommendations of the reviewers, 25 regular papers and 3 short papers were included in the final Program. We would like to thank the NWeSP’07 international program committee and the additional reviewers for providing the reviews in time.

Our special thanks to Mr. Patrick Kellenberger of IEEE Computer Society Press, for all the support and help related to the production of this important scientific work. Finally, we would like to express our sincere gratitude to all the authors and local organizing committees that have contributed towards the success of this conference. We look forward to seeing you in Seoul during NWeSP’07, October 29 - 31, 2007.
